

Nassima BOUCHTA

0606570820 | Nassimafz8@gmail.com | Casablanca, Maroc

Profile

Highly motivated Computer Science engineering student at École Hassania des Travaux Publics (EHTP), one of Morocco's most selective engineering schools. Strong foundations in mathematics, algorithms, systems and networks, built through two years of intensive CPGE-MP preparation and a rigorous engineering curriculum. Ranked 994th nationally at the Concours National Commun. Seeking a challenging internship or project opportunity to deepen technical expertise and contribute to innovative computing initiatives.

Education

Engineer's Degree — Computer Science

École Hassania des Travaux Publics (EHTP), Casablanca

Sep 2025 – Aug 2028

Classes Préparatoires — MP (Mathématiques-Physique)

Lycée Moulay Ali Cherif, Errachidia

sep 2023 – Jun 2025

Ranked 994th nationally at the Concours National Commun (CNC)

Baccalauréat — Sciences Mathématiques, Mention Bien

Lycée Sijelmassa, Errachidia

June 2023

Experience

Responsable Partenariats et Développement Stratégique

Hassania Junior Entreprise — EHTP

Oct 2025 – Present

Debater — English Section

The Great Debaters EHTP

Oct 2025 – Present

Skills

Programming

C /C++/ Python/ Assembly/ HTML/CSS/JavaScript/PHP

CS Foundations

Algorithms & Data Structures / Automata-Compiler Theory /

Object oriented programming / computer architecture

Data & Databases

SQL · Database Design · Relational Databases

Systems

Operating Systems (theory & administration : Ubuntu, Kali, Windows) · Computer Networks · System Administration

Mathematics

Analysis · Numerical Analysis · Probability & Statistics

Tools

Microsoft Excel · Google Workspace · L^AT_EX · PostgreSQL · Wireshark · Cisco Packet Tracer · VScode · Git · Github · Windows PowerShell

Languages

Arabic (native) · French (fluent, C1) · English (fluent, C1 — EF SET 70/100)

Soft Skills

Problem-solving · Project management · Team leadership · Public speaking

Certifications

EFSET English Certificate — C1 Advanced

EF Standard English Test · Score: 70 / 100

Jun 2025

SQL

Projects

- **Konane Game — C Implementation** — Designed and implemented a fully functional Konane (Hawaiian checkers) board game in C, covering game logic, board state management, move validation and a terminal-based user interface.
- **Longest Common Subsequence — Algorithmic Study** — Analysed and implemented the classic LCS problem using dynamic programming; compared time and space complexity across multiple approaches and produced a written study of results (Advanced Algorithmic module, EHTP).
- **Entrepreneurial Venture** — Conceptualised, planned and executed a small business project during the CPGE period, developing skills in project management, budgeting and team coordination.

Volunteering & Community

Public Speaking , Orientation Workshops & Debating

Ongoing

- Design and deliver orientation sessions for high-school students on higher education pathways, CPGE preparation and engineering careers.
- Participation in multiple national debating competitions representing EHTP Great Debater club (English section)
